

PROJECT & PROGRAMME MANAGEMENT

PUBLIC EXECUTIVE DELIVERY PROFILE / OCTOBER 2026

Complex technology. Confident delivery.

From plans to reality.

Senior project, programme and technical delivery capability for complex enterprise infrastructure, data-centre, cloud, cybersecurity and application transformation.

PROJECT LEADERSHIP

TECHNICAL CONTROL

DELIVERY EVIDENCE

Evidence over adjectives.

Selected programme and delivery examples from the underlying October 2026 professional record. Client organisations are intentionally anonymised.

~3,500

SERVER / VM ESTATE

Infrastructure delivery supporting a multi-site VMware-to-Nutanix migration programme.

90%+

BACKLOG REDUCTION

Approximate reduction in vulnerability findings over nine months, from c.10,500 to fewer than 1,000.

8,500+

EMPLOYEES SUPPORTED

Global Wi-Fi and connectivity consolidation in a distributed workplace environment.

30+

OFFICES

Technology and infrastructure delivery experience across internationally distributed locations.

SELECTED ASSURANCE DISCIPLINES

Structured delivery. Visible control.

01 GOVERN

Scope, RAID, change control, dependency mapping, governance cadence and accountable decisions.

02 DELIVER

Cross-functional engineering leadership, supplier coordination, testing and migration readiness.

03 HAND OVER

Service acceptance, operational transition, documentation and agreed release criteria.

DELIVERY PORTFOLIO

Complexity, managed.

Client names are withheld. The examples below describe sectors, technical scope and delivery responsibility without implying client endorsement.

1

DATA CENTRE TRANSFORMATION

UK & IRELAND / ENTERPRISE INFRASTRUCTURE

Infrastructure programme delivery supporting a multi-site VMware-to-Nutanix estate migration; coordination across compute, storage, networking, load balancing, testing and readiness.

2

CYBERSECURITY & REMEDIATION

GLOBAL / LIFE SCIENCES

Governance of vulnerability management, ownership, patch windows and technical remediation. Material backlog reduction supported by structured triage, reporting and escalation.

3

CLOUD & NETWORK MODERNISATION

INTERNATIONAL / AIRCRAFT LEASING

Global infrastructure transformation spanning Citrix, SD-WAN, connectivity, SQL, cloud integration, identity and platform lifecycle with multi-vendor accountability.

4

WORKPLACE & BUSINESS CHANGE

EUROPE / RETAIL & TECHNOLOGY

Office technology and workplace programmes covering major fit-outs, enterprise WAN integration, supplier delivery, business continuity and operational handover.

5

REGULATED FINANCIAL DELIVERY

IRELAND & INTERNATIONAL / FINANCIAL SERVICES

Cross-functional delivery across databases, non-functional testing, automation, environment management, resilience and executive reporting in regulated environments.

6

CLINICAL LOGISTICS & HEALTHCARE

EMEA & APAC / CLINICAL SERVICES

Infrastructure programmes supporting distributed clinical and temperature-controlled logistics operations, workplace upgrades and secure collaboration platforms.

TECHNICAL DELIVERY CAPABILITY

Depth across the stack.

The focus is delivery leadership: translating business objectives into controlled technical implementation and measurable operational outcomes.

PROGRAMME MANAGEMENT

Mobilisation, milestone ownership, steering governance, vendor control, reporting and delivery assurance.

DATA CENTRES & CLOUD

Infrastructure build, rack and network dependencies, platform migration, cutover, testing and service transition.

CYBERSECURITY & NETWORKS

Firewall replacement coordination, vulnerability governance, secure connectivity and dependency management.

APPLICATION & PLATFORM CHANGE

Application migration, server lifecycle, database and platform upgrades, change windows and release readiness.

AGILE & JIRA ENABLEMENT

Jira Cloud work structure, backlog clarity, delivery cadence, Scrum collaboration and reporting visibility.

GOVERNANCE & RECOVERY

RAID control, blockers, escalation, decision tracking, critical-path recovery and operational acceptance.

TECHNICAL FLUENCY

Platforms & infrastructure VMware / Nutanix · Azure / AWS · Microsoft & Linux estates · Citrix · SQL · Cisco · Palo Alto · WAN / LAN / WLAN

Delivery methods Scope and change control · RAID · Agile / Scrum · Jira · Steering reporting · Testing · Transition and service acceptance

Discuss a complex delivery requirement.
